

**Appendix I. Primers used for sequencing of the mt genome of *V melania*.** Red and blue colors refer to forward and reverse primers, respectively. Names in bold indicate the primers for long PCRs.

Primer	Nucleotide sequence 5' - 3'	Reference
N2-N699	ATAATCAGCCATCCTAAGTGGC	This study
N2-N1368	TCTTAAAGCTGTTCCAACATATGC	This study

## Appendix II. Putative secondary structures for the 22 tRNA genes in *V. melania*'s

mitogenome. Black dots indicate mismatches of base pairs.
